Annual Maintenance

Annual Maintenance is optional and due 1 year after the initial purchase. New software versions are released every January. Users are encouraged to upgrade every January. If the anniversary date of your purchase is not in January, we can pro-rate Maintenance. The cost to upgrade is listed above and includes technical support and any updates released throughout the year. Updates are not shipped.

## Leasing

We have an option to provide leasing for our Truss D&E software. The lease program is paid on a monthly basis. Initial cost of \$1995, then monthly payments for two years. After two years, leasee would have full use of the program. This option would require the user to call monthly for a password to reactivate the program for each month. If you would like to explore our leasing option, please contact our office or call us directly (719) 598-7666. Leasing is for US residents only.

## Ordering

You can order JFBA products by mail or fax. [Click here](#) for our printable order form.
